How to Connect to a Minecraft Server â€” The way in which you connect to a Minecraft server depends on what kind of server you are using. If you are using a Bukkit or Tekkit server, then the connection will be handled automatically and everything connected through the same IP address. You can connect directly by typing the IP address into your internet browser or the host name of the server. If you are using an individual private server, you will need to know an IP address of where your Minecraft Server is located. The easiest way that anyone can get this information is by going to their router's configuration settings and finding out the IP address given from them. This IP address is different for each device and will be different every time that a person uses it.",

How do I join my IP Address to a Minecraft Server? â€œ To connect to a Minecraft server, you will need an IP address or host name of the server. Connecting your Minecraft server via your IP address is the same as connecting to it directly through the internet without requiring any extra software. The primary way to get an IP address is by going into your internet browser's settings page and finding out what the current addresses given from your provider are for you. If you are using a Bukkit or Tekkit server, then this should be included with their connection instructions. With individual servers, there are a couple ways that you could go about getting this information. The first way would be to simply ask the host if you can connect to their IP address and they will give it to you. Otherwise, you can go through your router configuration page to find out the information that you need.",
